

### SAWTM

#### Novibra® type SAW™

Novibra® elements type SAW is heavy duty mountings for static and shock loads in compression. Provides high isolation in the horizontal shear direction.

Typical fields of application are:

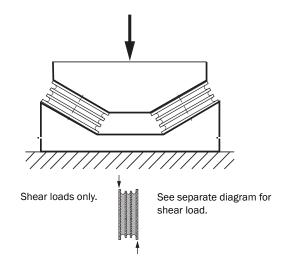

- ▼ Mills
- Edge runners
- Grinders
- Vibratory rollers
- Screens
- Hoppers and feeders
- Crushers
- Other very heavy machines and equipment

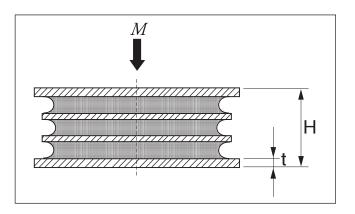

#### **Features**

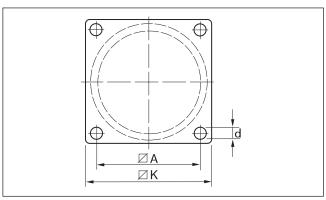

Novibra® type SAW™ mountings consist of a cylindrical shaped rubber section with integrally bonded interleaf metal plates bonded to two square heavy duty outer metal fixing plates. Designed for large compressive forces with minimum deformation, while providing low shear stiffness rates.

The combination of a stable low installation height, high compressive strength and low shear stiffness makes Novibra® type SAW™ a versatile high performance anti-vibration mounting. Ease of installation due to 4 clearance holes in each fixing plate.

By connecting 2 SAW-elements in series, i.e. one on top of the other, an increased isolation efficiency is achieved in both shear and compression planes. Where larger deflections are required in the vertical plane, Novibra® type SAW<sup>TM</sup> mountings are mounted at a calculated angle configuration to provide the optimum spring rate.

Туре	Part no.		Dimensions in mm					M-Max (Kg)		Weight
	40°IRH	60°IRH	A	K	Н	d	t	40°IRH	60°IRH	(Kg)
